Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities:
on page 7, lines 18 and 19, change "F" to ----P----; and on page 10, line 10, change
"Heel 30" to ----Heel 60----.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Branch
(5,363,897).

Branch discloses a tire-demounting tool for demounting at least a bead of a tire over a rim of a wheel, comprising: a handle (21); a working end extending radially outward from one end of the handle (see figs. 5, 13A). Branch also discloses the working end includes a heel portion (20), an elongate lever arm adapted to extend between the wheel rim and a bead of the tire and having a reach adapted to span the wheel rim to a distal bead of the tire (see fig. 13A); and a crook adapted to receive the wheel rim such that the heel portion remains outside of the wheel rim (see fig. 13A).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Branch (5,363,897).

Branch discloses a tire demounting tool comprising:

a handle (21); a working tool extending from one end of the handle, the working tool includes a first bend proximate the end of the handle and extending a first portion of the working tool radially outward and axially inward; said first bend defining a heel (20); a second bend between said first portion and a second portion of the working tool, said second portion extending radially outward and axially outward, said second bend defining a crook; and a third bend terminating the second portion, said third bend extending a third portion of the working tool radially outward and axially inward, said third bend defining a ball portion. **Branch** discloses a tip (18) but fails to disclose a fourth bend terminating the third portion of the working tool wherein the fourth bend extending a fourth portion of the working tool radially outward and axially outward, said fourth portion defining a tip.

Brunner discloses a tire-changing tool having a portion defining a tip (116) that extends outward and axially outward. It would have been obvious to one skill in the art at the time the invention was made to modify the tool of Branch with a portion defining a tip

Art Unit: 3723

that extends outward and axially outward in view of Brunner so as to assist in engaging the bead of the tire.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Craft discloses a tire-mounting tool.
